

# INTELI GLUE

IoT Data & Management Platform

InteliGlue is highly scalable IoT data & management platform, provided as a Software as a Service (SaaS). The platform is built on open communication and connectivity standards, is unopinionated, is configurable to any specific solution and is ready for instant use.

## INTELI GLUE MAIN FEATURES

- Data acquisition from various devices e.g. sensors, things, gateways, information systems or other data platforms
- Time series data ingestion, storage and query
- Multitenant platform with sophisticated access rights
- Connectivity technologies agnostic

## EASY TO USE, SIMPLE TO INTEGRATE

- Unopinionated data platform
- Publish or subscribe data using MQTT
- Fetch stored data by HTTP REST endpoint
- Developed in accordance with the industrial security standards
- Cloud or on premises provisioned
